

Tying Wire & Concrete Spacers

Tying Wire & Concrete Spacers

Concrete Spacers and tying wire are the essentials of fixing steel reinforcement. Our range goes much further and provides a multitude of options designed to give the best solution for particular applications.

Tying Wire

Supplied as Soft Black Annealed Wire 17g

Stainless Steel Tying Wire

Supplied as 18 gauge

Tying Wire Dispensers

Supplied as 2 kg Coils

Bucket of Mice

Supplied as 15kg Tubs 75 No. coils of 200g each

Bucket of Mice

Description

A watertight bucket containing 75 no. mini-coils (200g) of tying wire, designed to make steel fixing easier, safer & more economic.

Benefits

Safety

- No trip hazard
- No need for repeated bending to pick up heavy coils of wire
- No dangerous flying ends

Ease of use

- Watertight Buckets can be stored near location of fixing. No need for constant trips back to containers
- Different fixers can work from the same bucket – taking a few coils which can easily be carried in pockets or on belts
- Every coil is taken out of the bucket 'factory fresh', which means prime fixing wire
- The 200g weight gives maximum ease of use

Economical

- No rusty wire = no waste
- No tangled wire = no waste
- No need to purchase plastic reels or similarly expensive items
- No longer the need for each fixer to have his 'own' 20kg coil

Packaging

Each 15kg tub contains 75 no. mini coils of 200g each.

Technical Data

17 gauge (1.4mm) Black Soft Annealed Tying Wire.

Double Loop Ties

Length (mm)	Pack Size (No.)
